

## Using Blockchain and Cryptocurrency to Fund Efforts for Impact

**Bryan Allen**, *Business Development Manager*, [Propertyshelf Inc.](#)

Bryan is ....

Propertyshelf Inc. offers a global real estate and MLS connection for effective promotion and management of properties on a global scale.

### **Project Description:**

Blockchain and cryptocurrency makes it possible for transactions to be processed quickly and securely, without the need for a centralized authority. By leveraging the power of blockchain and cryptocurrency, our community can raise and contribute funds to certain causes, securely process transactions and reduce dependence on traditional financial institutions.

This project aims to create a Christian ecosystem for blockchain to fund efforts for impact. A proof of concept with doing contracts and transactions with real estate for store of value will allow for the technology to be scaled and utilized for impact. The platform will utilize smart contracts to automate and secure the contract transaction process to make it transparent, secure, and efficient.

The end goal of this initiative is to leverage the power of blockchain technology to revolutionize the way that social impact initiatives and projects are funded, planned, and executed.

### **Project Goals:**

1. Build a proof of concept blockchain ecosystem within Ethereum.
2. Garner support from the community and local leaders and influencers.

### **Project Metrics:**

1. Tested proof of concept blockchain ecosystem for basic generic real estate contracts.
2. Number of users and supporters in the community.

### **Who is involved? Who else needs to be involved?**

PropertyShelf. Additional partners needed.
